

161. (New) A kit for protecting at least one keratinous fiber from keratinous damage or for repairing at least one keratinous fiber following extrinsic damage, said kit comprising at least one compartment,

wherein said at least one compartment comprises a composition comprising:

(a) at least one film forming agent; and

(b) at least one compound chosen from C₃ to C₅ monosaccharides,

wherein said at least one film forming agent and said at least one compound are present in an amount effective to impart a durable non-permanent shape to said at least one keratinous fiber or to durably retain a non-permanent shape of said at least one keratinous fiber.

162. (New) A kit according to claim 161, wherein said composition further comprises at least one additional sugar, different from said at least one compound.

163. (New) A kit for protecting at least one keratinous fiber from keratinous damage or for repairing at least one keratinous fiber following extrinsic damage, said kit comprising at least two compartments,

wherein one compartment comprises a composition comprising at least one compound chosen from C₃ to C₅ monosaccharides,

wherein a second compartment comprises at least one film forming agent, and

wherein said at least one compound and said at least one film forming agent are present in an amount effective to impart a durable non-permanent shape to said at least one keratinous fiber or to durably retain a non-permanent shape of said at least one keratinous fiber.
